

MOBACO

O EN 1

MADE IN HOLLAND

AANWIJZINGEN VOOR HET BOUWEN MET M O B A C O.

Zoals men elk huis begint met de fundering, begint men bij het bouwen met MOBACO met de grondplaat, waarin zich verschillende vierkante gaten bevinden. In deze gaten passen de gegroefde houten paaltjes. De groeven in deze paaltjes dienen om het mogelijk te maken dat de gekleurde cartonnen onderdelen hierin op en neer kunnen schuiven, en aldus een verbinding vormen tussen de palen.

Alle onderdelen zijn voorzien van nummers, terwijl bovendien elk onderdeel in zijn eigen kleur is afgedrukt in de deksel van elke doos, waardoor het zeer gemakkelijk is aardige huisjes te bouwen volgens de plattegronden, welke door corresponderende nummers aanwijzingen geven.

Nadat dus de grondplaat gelegd is, en de palen zijn opgezet, schuift men de gekleurde stukjes carton tussen de palen, volgens Fig. I van de plattegrond. Fig. II en III vormen steeds de vloer van de 1e verdieping. Voor het construeren der verdere verdiepingen geven de plattegronden steeds praktische aanwijzingen.

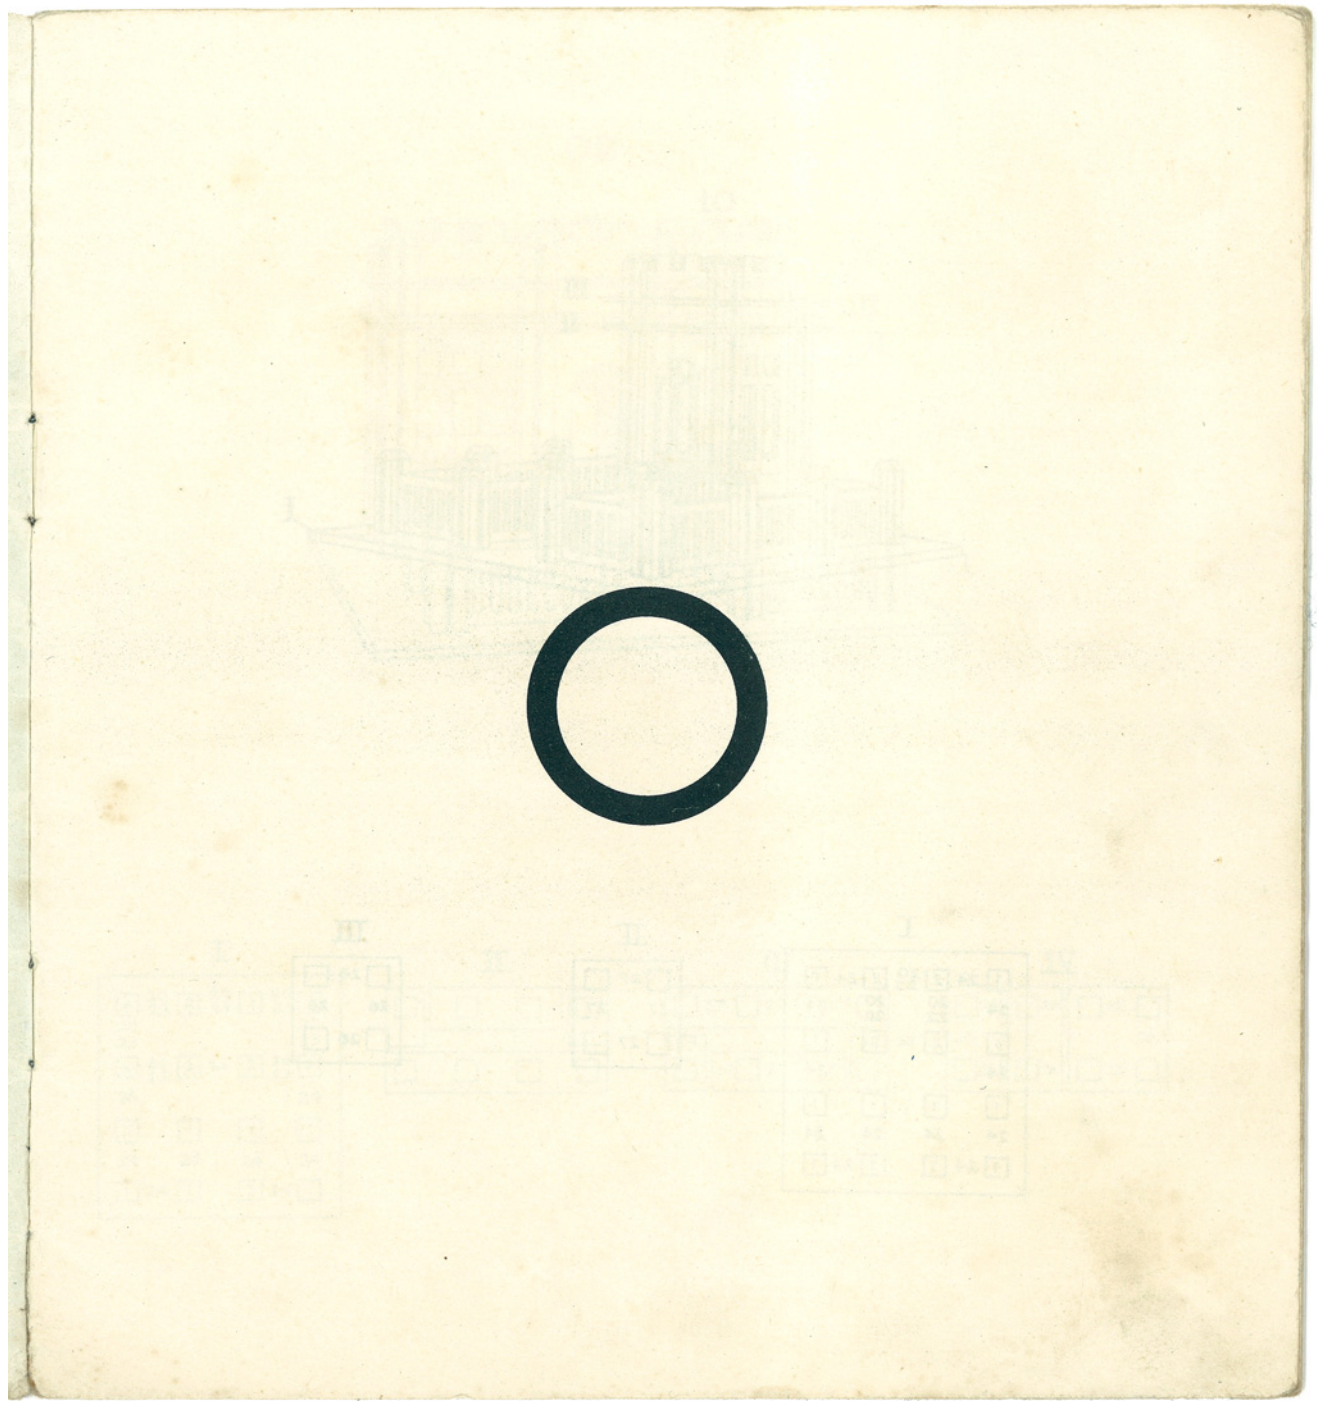

Wat betreft het plaatsn der cartonnen delen, geeft het onderste getal op de plattegrond steeds het onderste cartonnen deel aan, terwijl het bovenste nummer steeds het daarop te plaatsn deel aangeeft; dit gaat dus in volgorde van het bouwen.

Het spreekt van zelf dat men ook volgens eigen inzicht kan bouwen, hetgeen MOBACO des te aantrekkelijker maakt, en dus voor alle leeftijden een zeer practisch, leerzaam en aangenaam speelgoed is.

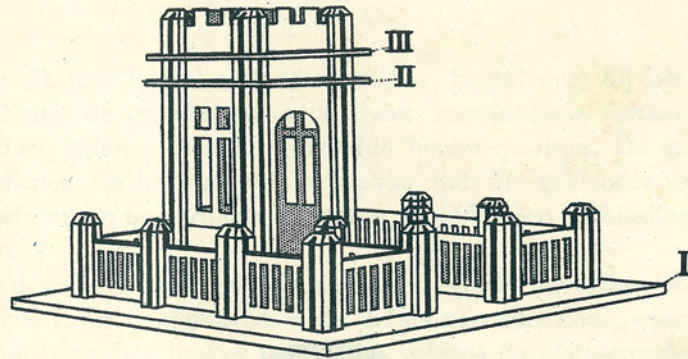

Losse onderdelen zijn steeds verkrijgbaar.

Dozen 1, 1 A, 2, 2 A en 3 vullen elkaar aan en vormen dus een ketting.

$1 + 1A = 2$; $2 + 2A = 3$; $1 + 1A + 2A = 3$.
